

FINANCIAL PLANNING

The Board of Education understands that financial stability of the school district is key to attaining its vision. A stable financial situation will strengthen trusting relationships permitting leadership and staff to focus on student achievement.

The Governance Compact, adopted by the Board of Education on September 5, 2000 and subsequently amended calls for the Board to be stewards of the District's financial resources. In order to comply with the direction provided by the Compact, the Board of Education directs the administration to develop and maintain a proactive, long term financial plan including fund balance guidelines that will protect the financial resources of the District.
