

# District 62 Website Redesigned

*October 1, 2006* – The District 62 administrative team has been hard at work since July 2006 to create the website design you are currently browsing. The goal of the project was to update all district content and create a design that is easy to navigate and find the information that is most requested by our community.

"Now that the new district-level pages are well underway, we can begin to focus on updating the design and content for each of our schools," reported Matt Fuller, District 62's Director of

Information and Instructional Technology who is handling the redesign project. A committee of district principals has already met to determine the content and features for the building pages. Each building will be brought online, one at a time, until all eleven are completed. To report a problem in the new website, suggest a new feature, or suggest additional content, please email our web design team at [info@d62.org](mailto:info@d62.org).
